PROFESSIONAL SAFETY KNIVES

WHY SAFETY KNIVES?

40.000

Source: DGUV2022

DID YOU KNOW HOW MANY REPORTABLE ACCIDENTS AT WORK WITH KNIVES HAPPEN EVERY YEAR IN GERMANY?

Hands, arms and legs are particularly affected by cut injuries. On top of this the damage to goods caused by the use of knives can hardly be quantified. That's why you want to cut safely and at the same time protect your goods!

With us you will find every level of security:

- Safety knives with finger friendly ceramic blades
- Safety knives with concealed blades
- Safety knives with fully automatic blade retraction (smart)
- Safety knives with protective hood
- Safety knives with automatic blade retraction
- Safety knives with squeeze grip
- Eco safety knives with pre-consumer recycled content

But even beyond that, many of our safety knives are about intelligent details:

- Attractive hi-vis colours, often several choices per knife.
- Knives with interchangeable and different blade heads: "Keep the handle, replace the head!".
- Integrated tape splitter: protects your blade, and is also safer to use.
- Safety knives with blade guards, that also act as a cutting guide.
- Replacement blade controls: simply practical.
- Adjustable blade lengths: So you protect packaged material even better!
- Multi-purpose safety knives, with both open and concealed blades. For those who have to be able to do everything!

SAFETY PRODUCTS
GLOBAL

slice **KLEVER.** **PHC**
PACIFIC HANDY CUTTER

PACIFIC HANDY CUTTER, our oldest brand, has been producing safe cutting solutions since 1950. This experience makes us a globally leading manufacturer and supplier of safety knives.

KLEVER is our concealed blade specialist and global leader in this sector.

SLICE: unique and Finger Friendly. Market leading ceramic brand.

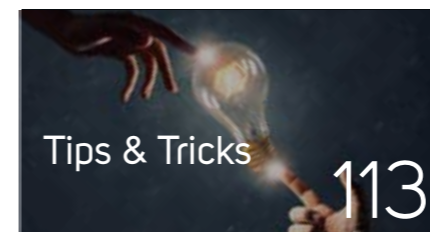

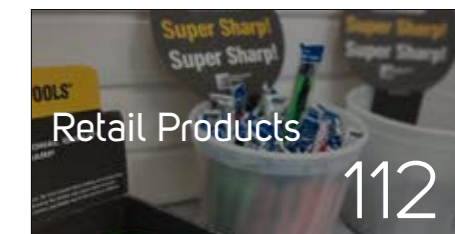

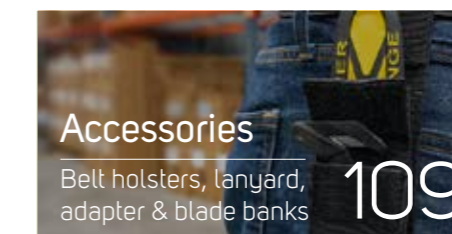

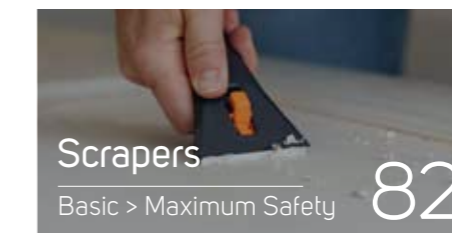

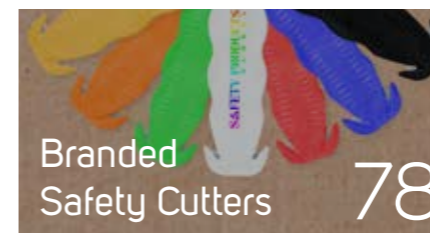

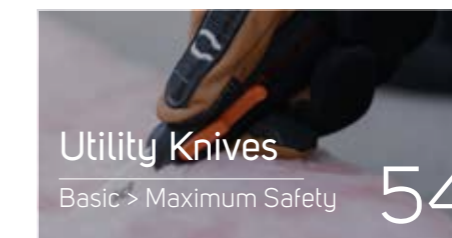

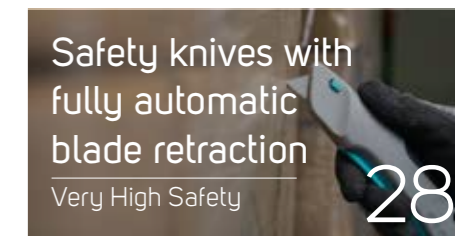

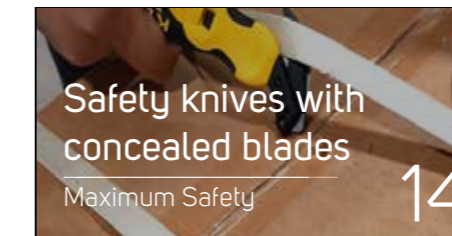

This experience makes us a globally leading manufacturer. With our portfolio of brands, we offer safe cutting solutions for almost all applications in almost every industry. Who could give you more choice? In our own plants in California and Michigan we manufacture not only safety knives but also blades. In house manufacturing ensures the highest quality standards.

For more information, visit:

www.safetyproductsholdings.com or our brand websites www.eu.sliceproducts.com, www.kleverinnovations.net and www.phcsafety.com

We are convinced by the safety, variety and quality of our products and services, and we want to convince you too! Just call or e-mail if you need further information.

WHAT DO WE OFFER?

Safety Products Global or SPG is a global leader in the design and manufacture of safety knives. The group consists of three leading brands, each with its own USP.

This portfolio of brands, and safety knife products allows us to support almost all safe cutting applications. A tailored approach that equips users with the correct safe cutting tool for the job at hand.

There are ceramic blades and then there is SLICE! The only Finger Friendly safety blade in the market. The combination of hard-wearing zirconium oxide material, together with our Finger Friendly grind, makes SLICE blades last up to 11x longer than traditional blades. Combine these blades with our huge variety of innovative, ergonomic SLICE handles and enjoy the highest level of safety available in an open blade safety knife.

More reasons to use SLICE: Non-magnetic, non-conductive, non-sparking, safe up to 1600 degrees Celsius, chemically inert and non-contaminating, non-reactive: impervious to acids and salt, non-porous and chemically resistant, oil and lubricant free, never rusts.

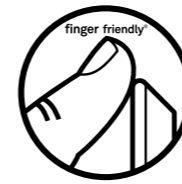

The market leader in enclosed blade safety knives, KLEVER has set the standard since the original KLEVER Cutter hit the market. Manufactured in our state-of-the-art facility in Michigan, USA. KLEVER boasts an impressive portfolio of enclosed blade safety knives that are popular the world over. The KLEVER XCHANGE, KLEVER KUTTER and our range of ECO products made from high percentages of pre-consumer recycled plastic lead the way in the sector. Ever growing in popularity.

Add to this our new Smooth Kut XD heads and you will see why KLEVER is so popular.

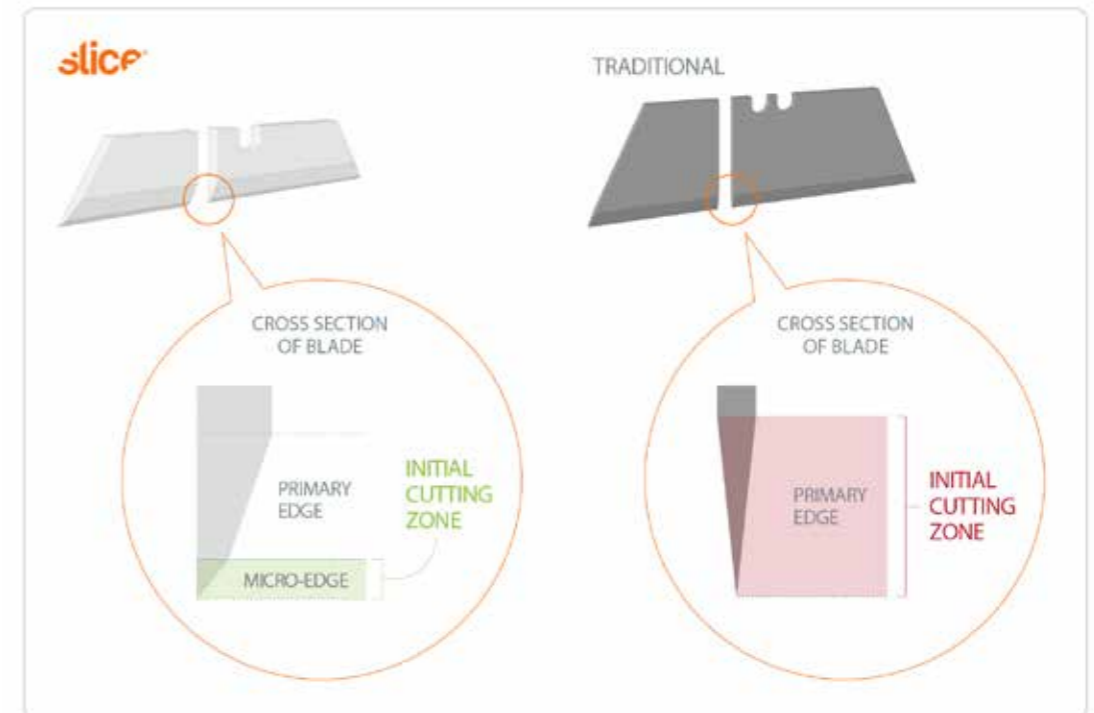

Our original, founding brand Pacific Handy Cutter or PHC dates back to 1950, when Herbert Lightburn designed and made the original Handy Cutter. Things have developed a little since then its fair to say! PHC manufactures steel blades in our California HQ. Utilising these blades in safety knife handles, with different intelligent safety mechanisms. Smart-Retract, or fully automatic, Auto-Retract or automatic blade retraction mechanisms are designed for user safety, alongside other features that also protect the goods contained in the packaging being opened.

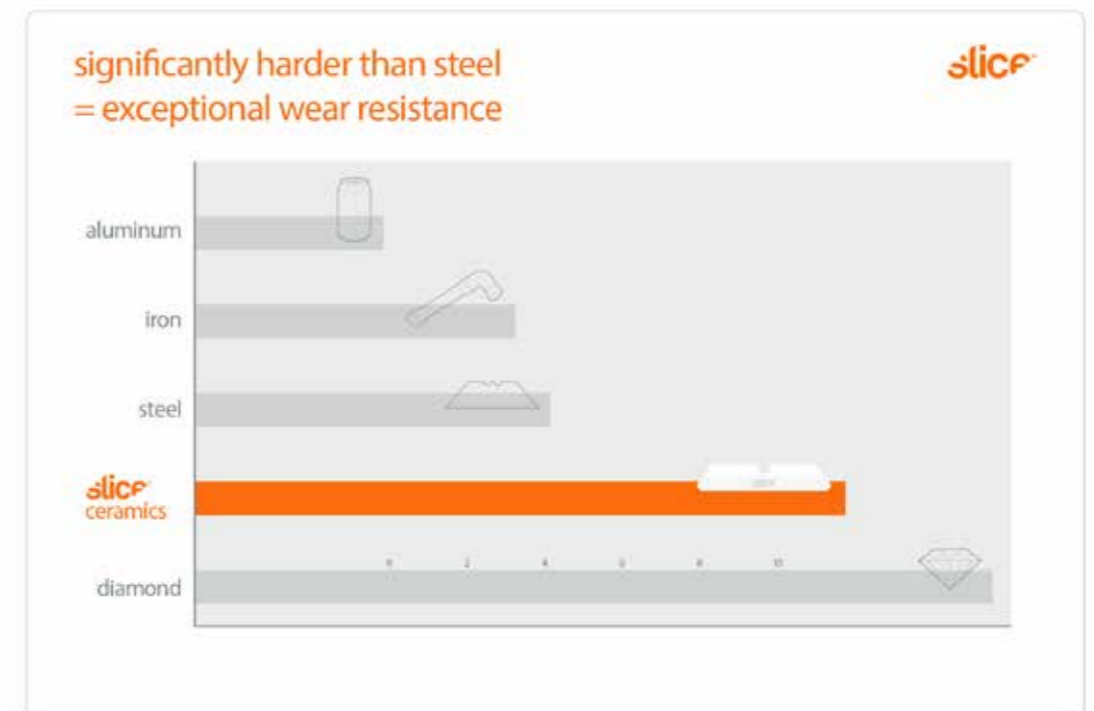

WHY SLICE?

Why is a SLICE blade different from other blades? It's our unique, Finger Friendly grind that sets us apart. Not just from steel blades, but other ceramic blades too. Due to this special grind, SLICE blades cut nearly all materials but are much safer to the touch.

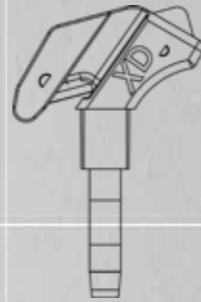

Made from hard wearing Zirconium Oxide, SLICE blades last up to 11x longer than conventional blades. When you couple that with the Finger Friendly grind and all of the other properties that come with a SLICE blade, you've found an unrivalled excellence in safe cutting.

KLEVER.XD

ENHANCE YOUR CUTTING EXPERIENCE SUBSTANTIALLY

ENGINEERED FOR EXTRA STRENGTH

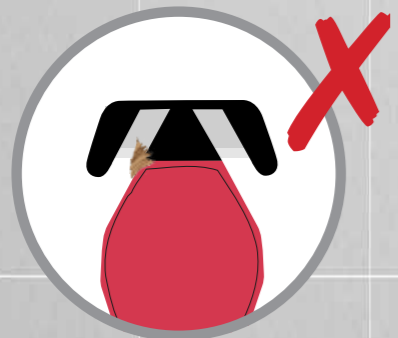

**50% STRONGER &
LASTS UP TO 4X
LONGER**

Thickened reinforced plastic in high friction stress points making the blade 50% stronger and lasts up to 4 times longer than other safety cutters.

PROPRIETARY SMOOTH-KUT™ TECHNOLOGY

Prevents corrugate from clogging in the blade for faster, smoother, and more ergonomic cutting.

Clogged blades reduce operator cutting speed and introduce risk of injury when removing corrugate.

ECO SAFETY KNIVES

Protecting people, products & our planet

ECO-200XC-20EX

ECO-4-65EX

ECO-1-E

Our new range of safety knives made from pre-consumer recycled plastic content.

Independently certified.

KLEVER ECO KUTTER

75% RECYCLED PLASTIC

The KLEVER ECO KUTTER is our all-rounder made with 75% pre-consumer recycled plastics. Support your ESG goals with your safety knife. Small, handy, versatile, and especially safe! Maximum level of safety, protecting users and goods at the same time. Double blade head, so particularly economical. Disposable. Ideal for single-wall corrugated, cardboard, foil, adhesive tape, delivery note bags, strapping tape, paper, string, etc. With practical eyelet for lanyard fastening or hanging. Also available in standard, KLEEN, NSF and MDP, see page 14, 66, 71 and 74.

KLEVER XCHANGE PLUS 30

CHOICE OF FIVE CUTTING HEADS

Are you looking for a sustainable all-round talent with great variety and maximum safety, but still want a particularly economical solution? Then you will love the KLEVER XCHANGE PLUS 30 safety knife! It offers a stable and ergonomic grip as well as multiple support surfaces for your thumb. The knife handle is reusable in many ways, the wide blade head makes the knife very functional. "Keep the handle, replace the head!" These wider mouth blades are concealed to protect the user and material, plus the blade heads are very easy to replace. The KLEVER XCHANGE PLUS 30 is ideal for up to 2 wall corrugated, cardboard, strapping, adhesive tape, string, bagged goods, felt, textiles, etc. Here in bright yellow. Many other colours available. With integrated tape splitter and practical lanyard eyelet. Can also be combined with any of our five replacement blade heads - a real talent!

SMART RETRACT METAL SQUEEZE GRIP SAFETY KNIFE

FINGER FRIENDLY BLADE

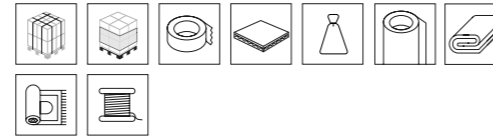

The SLICE Smart-Retracting Metal-Handle Squeeze Knife combines safety and intelligence to reduce injuries without reducing productivity. Particularly safe due to its fully automatic blade retraction, the blade retracts when it loses contact with its cutting material, even if it is still engaged. A blade lock prevents accidental blade exposure during storage. The tool has a durable metal handle that provides comfort, strength and control. It's suitable for left- and right-handed workers, and the tool-free blade-change mechanism and integrated lanyard hole provide extra convenience for your workforce.

VICTA SMART-RETRACT

FULLY AUTOMATIC WITH BLADE LOCK

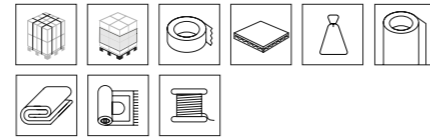

The Victa Smart-Retract squeeze grip is a robust safety knife with a metal body, for the toughest tasks! It has a fully automatic blade retraction and so is particularly safe. The blade pulls fully, then returns to the knife body once contact is lost, even if the grip is still engaged. The sturdy metal handle has non-slip rubber components. Easy, no tool blade change is also a feature of the Victa, simply squeeze the grip and depress the blade change button. By means of an eyelet at the end of the handle, the knife can be attached or hung. There is also a blade lock feature for additional safety. Victa is particularly suitable for thicker cutting materials, corrugated board, strapping, adhesive tape, foil, textiles, felt, PVC, leather, rubber, string, etc

REBEL SMART-RETRACT

FULLY AUTOMATIC WITH BLADE LOCK

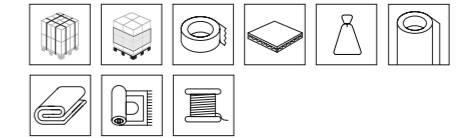

The Rebel Smart-Retract squeeze grip safety knife with fully automatic blade retraction. To cut, simply squeeze to expose the blade, due to its fully automatic safety mechanism, the Rebel's blade will retract, even if still engaged, once you lose the tension of your cut. Ambidextrous, so suitable for right- and left-handers. This safety knife is particularly light weight, therefore especially user friendly during repeated use. The easy, no tool blade change is actioned by squeezing to engage the blade and depressing the blade change button. With practical eyelet for lanyard fastening or hanging and a blade lock feature for added safety.

QBAR

FULLY AUTOMATIC / EASY TO CLEAN

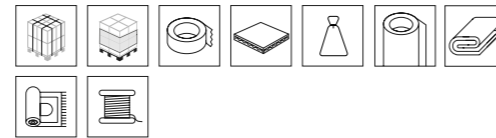

The QBAR is a particularly robust safety knife made of aluminium, for the toughest applications! It has a fully automatic blade retraction and so is particularly safe. In addition, a blade with a rounded tip to reduce the risk of punctures is standard. The blade pulls fully automatically, then returns to the grip body, even if your thumb remains on the slider after the cut. The 3-way slider is particularly ergonomic and suitable for horizontal and vertical cuts. Of course, the QBAR is suitable for right- and left-handed users. The sturdy metal handle has good grip, with non-slip rubber components. Your knife is dirty? No problem! Thanks to the central lock it can be opened very easily without tools, to clean and to change the blade. The handle, very practically, accommodates replacement blades. By means of an eyelet at the end of the handle, the QBAR can be attached or hung. The tape splitter on the underside of the knife head protects your blade life. Particularly suitable for thicker cutting materials, corrugated board, strapping, adhesive tape, foil, textiles, felt, PVC, leather, rubber, string, etc.

RSC-432

AUTOMATIC GUARD / NSF CERTIFIED

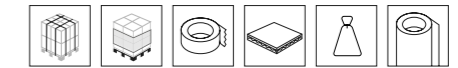

The RSC-432 is a safety knife with a fully automatic protective cap. For cutting, the protective cap is unlocked by means of a slider, after the cut the protective cap covers the blade fully automatically. Therefore, the RSC432 is particularly safe. The three-sided slider makes the knife particularly flexible. Of course, it is suitable for right- and left-handers. The safety knife has an NSF certification (National Sanitation Foundation, USA) and is therefore especially suitable for use in the food industry. The blade is rust-free and cannot be changed. This eliminates the risk of loose blades in production. With integrated tape splitter and practical eyelet for lanyard fastening or hanging.

EZ3

AMBIDEXTROUS LIGHT WEIGHT

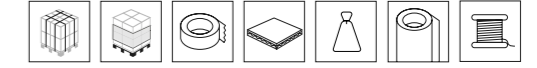

The EZ3 is a lightweight safety knife with automatic blade retraction. Thus, it offers a high level of safety. Due to the plastic body, it is particularly economical. Changing the blade is very easy, and the knife handle can be opened completely for cleaning. Additional blades can be stowed away in the knife handle. Short blade length, therefore suitable for light cutting activities. Knife in clearly visible yellow.

S7

MULTITOOL

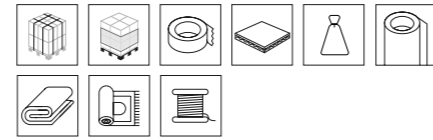

If there is such a thing as an all-rounder, it is without doubt the S7! The knife has an automatic blade retraction offering you a high level of safety. In addition, the blade depth can be adjusted in three lengths. This gives you additional protection and protects your goods. At the same time, the blade can also be activated behind the guard. As a result, the open blade is shielded from immediate access. The angled guard also serves as a cutting guide for box topping. The trapezoidal blade can be turned and used twice, making the S7 particularly economical. At the end of the handle there is an additional concealed blade cutting head, safely activated by the slider, which is ideal for foils and strapping. The slider is locked in place whilst the cutting head is active. Meaning that the blade is locked safely away. A real all-rounder!

Other Features

A safety knife for your pocket? Although we generally advise against storing a knife with direct contact with the body, this is quite possible with the Pocket Safety Cutter! The PSC2 is a small but full-fledged, foldable safety knife with automatic blade retraction. As a result, it offers you a high level of safety for light cutting activities. Safety cut, fold, stow away, done! When folded, the knife locks automatically so that it cannot open on its own. It couldn't be safer! With practical metal tape splitter. Fits in any pocket, but also on your key ring or a lanyard. If you want to customize your safety knife, the PSC is particularly suitable thanks to the large flat side surfaces. We are happy to offer you product branding options.

MANUAL INDUSTRIAL KNIFE

FINGER FRIENDLY BLADE

The SLICE Manual Industrial Safety Knife was designed to cut through thick materials like foam and fiberglass insulation quickly and efficiently and with far fewer blade changes. We know how much fiberglass can damage blades, so we created the SLICE Manual Industrial Knife. The durable, five-position handle offers four cutting depths for multiple jobs around the production floor and in your home. Switch the blade for left and right hand use.

INVISIBLE AND
YET SO VALUABLE!

KLEEN safety knives are made of plastic with an antimicrobial additive.

This additive drastically restricts the growth of many bacteria and germs on the knife. That's why KLEEN safety knives are certified according to ISO 22196.

The antibacterial active ingredient is integral to the plastic, so it lasts for the lifetime of the knife.

NSF FOOD ZONE PRODUCTS

What is NSF?

NSF International, The Public Health and Safety Organisation, is a global independent organisation that develops public health standards for products in the food, water and health sciences and consumer goods industries. The NSF Food Equipment Certification Programme sets the standards that establish the minimum food protection and sanitation equipment requirements for food handling and processing equipment. Search for accredited KLEVER Innovations and Pacific Handy Cutter tools here: www.nsf.org

What is the 'Food Zone'?

The NSF food equipment standards define separate "Zones" to classify surfaces or areas of with different levels of exposure to food products.

Food Zones are areas intended to be exposed to indirect food contact. Equipment or materials that are Food Zone Certified may be used near or have indirect contact with food and are also suitable for use in Splash and Nonfood Zones.

Splash Zones are areas that are exposed to routine soiling from splashes and spills, but not intended for contact with consumable food.

Nonfood Zones are areas that are not exposed to food or splashes.

EU HACCP Colour Recommendations

- RED = RAW MEAT / POULTRY
- WHITE = CHEESE / BREAD / BAKING
- GREEN = FRUITS / HERBS / SALADS
- BLUE = SEAFOOD
- BROWN = VEGETABLES
- YELLOW = COOKED MEAT

What are HACCP Guidelines? Why are the colours important? Are the colour designations mandatory?

HACCP (Hazard Analysis Critical Control Point) is a management system in which food safety is addressed through the analysis and control of raw food hazards from production to manufacturing and consumption. HACCP guidelines provide common best practices like a recommended colour-coding system, and while not mandatory, following a colour-coded protocol for designated food areas is highly beneficial for optimal food safety.

KLEVER KUTTER NSF FOOD ZONE

NSF APPROVED

FINDABLE SO ESSENTIAL!

In many industries, foreign particles or objects must be avoided at all costs. These include the food, chemical and pharmaceutical industries, but also many others. Metal parts can usually be reliably detected by detectors. But what about plastic parts? MDP stands for "metal detectable plastic": plastic that is molded with the smallest metal particles and is thus also detected by detectors. We provide you with samples that are available to individually adjust your sensors based on our products.

KLEVER KUTTER MD

STAINLESS STEEL BLADE

The KLEVER KUTTER MD offers the highest level of safety, protecting users and goods at the same time. Double blade head, so particularly economical. Disposable. Stainless steel blade and our KLEEN antimicrobial ingredient make this a unique proposition. Our metal-detectable version, specially designed for the food, pharmaceutical and chemical industries. Ideal for single-wave corrugated, cardboard, foil, adhesive tape, delivery note bags, strapping tape, paper, string, etc. With practical eyelet for lanyard fastening or hanging.

AUTO UTILITY SCRAPER

FINGER FRIENDLY BLADE

Tired of dealing with hand strain with your manual scraper? Longing for a blade that doesn't dull after a few uses? The SLICE Auto-Retractable Utility Scraper delivers on all fronts with its finger-friendly edge and ergonomic design. Created to scrape everything but you, the SLICE Auto-Retractable Utility Scraper features soft-touch grips and a sturdy handle for optimal comfort and ease of use. Scrapers typically pose a risk of hand strain, whereas, for this auto-retractable scraper, the SureScrape mechanism absorbs the pressure.

BOX CUTTER BLADES

POINTED TIP

SLICE Box Cutter Blades (Pointed Tip) are compatible with several tools, including SLICE Box Cutters, Pen Cutters, Mini Cutters, and the EDC Folding Knife. Designed to cut everything but you, these blades boast a finger-friendly edge that never rusts. The pointed tip is ideal for tougher materials – use a piercing action to initiate the cut in the centre of a flexible material like plastic sheeting.

PRODUCT DETAILS

Model	10408
PRODUCT CODES	10408
Dimensions LxWxH	3.3 x 6.26 x 1.33 mm
Weight	0.9 g
Compatible with	10400, 10474, 10475, 10495, 10512, 10514

Available in	4 Units in Retail Packaging 1 Inner Carton of 6 Packs 1 Master Carton of 48 Packs

DEBURRING BLADE

CONVEX

SLICE Deburring Blade (Convex) is designed specifically for the SLICE Deburring Tool. Featuring a convex design with a curved edge, these blades effortlessly remove burrs and other defects from various materials, from sheet metal and injection-molded plastic to 3D printing, resulting in smooth surfaces and edges.

PRODUCT DETAILS

Model	10483
PRODUCT CODES	10483
Dimensions LxWxH	60 x 15 x 1.8 mm
Weight	7.6 g
Compatible with	10482
Available in	2 Units in Retail Packaging 1 Inner Carton of 6 Packs 1 Master Carton of 48 Packs

CRAFT BLADES

STRAIGHT EDGE, POINTED TIP

SLICE Craft Blades (Straight Edge, Pointed Tip) are compatible with multiple tools, including SLICE craft knives, the Scalpel, and the Precision Knife. Designed to cut everything except you, these blades boast a finger-friendly edge that never rusts. The pointed tip is ideal for intricate, precise cutting. It's perfect for scratchboard or coloured pencil art detail, as well as paper art.

PRODUCT DETAILS

Model	10519
PRODUCT CODES	10519
Dimensions LxWxH	32.6 x 6.2 x 0.82 mm
Weight	0.64 g
Compatible with	10548, 10568, 10580, 10589
Available in	4 Units in Retail Packaging 1 Inner Carton of 6 Packs 1 Master Carton of 48 Packs

DEBURRING BLADE

CONCAVE

SLICE Deburring Blade (Concave) is designed specifically for the SLICE Deburring Tool. Featuring a concave design with a straight, beveled edge, these blades easily remove burrs and other defects from raw edges. The result? A smooth finish on a variety of materials from sheet metal and injection-molded plastic to 3D printing.

PRODUCT DETAILS

Model	10484
PRODUCT CODES	10484
Dimensions LxWxH	60 x 15 x 1.8 mm
Weight	6.9 g
Compatible with	10482
Available in	2 Units in Retail Packaging 1 Inner Carton of 6 Packs 1 Master Carton of 48 Packs

CRAFT BLADES

CURVED EDGE, ROUNDED TIP

SLICE Craft Blades (Curved Edge, Rounded Tip) are compatible with multiple craft tools, including SLICE Craft Knives, the Scalpel, and the Precision Knife. The rounded tip is a safer alternative that reduces the risk of lacerations, while the curved edge adds maneuverability. From cutting vinyl to adding details in fondant and leather, SLICE makes people and places safer.

PRODUCT DETAILS

Model	10520
PRODUCT CODES	10520
Dimensions LxWxH	32.87 x 6.19 x 0.57 mm

Available in	4 Units in Retail Packaging 1 Inner Carton of 6 Packs 1 Master Carton of 48 Packs

CORNER STRIPPING BLADES

DOUBLE CURVED

SLICE Corner-Stripping Blades are compatible with multiple tools, including SLICE Craft Knives, Scalpel, and Precision Knife. The double-curved edges and pointed tip are optimal for stripping and trimming in tight corners and trimming caulking. The durability of these blades means fewer blade changes and fewer injuries.

PRODUCT DETAILS

Model	10532
PRODUCT CODES	10532
Dimensions LxWxH	33.2 x 6.15 x 0.87 mm
Weight	0.7 g
Compatible with	10548, 10568, 10580, 10589
Available in	4 Units in Retail Packaging 1 Inner Carton of 6 Packs 1 Master Carton of 48 Packs

SEAM RIPPER BLADES

ROUNDED TIP

SLICE Seam Ripper Blades (Rounded Tip) are compatible with multiple tools, including SLICE Seam Rippers, Craft Knives, the Scalpel, and the Precision Knife. The rounded tip offers a safer alternative to traditional seam ripper blades, protecting you and the fabric from accidental punctures while you work. Since these blades never rust, you don't have to worry about damaging your materials with stains. They're safe, effective, and easy to clean.

PRODUCT DETAILS

Model	10536
PRODUCT CODES	10536
Dimensions LxWxH	32.8 x 6.06 x 0.8 mm
Weight	0.37 g
Compatible with	10548, 10568, 10580, 10589, 10596, 10597
Available in	4 Units in Retail Packaging 1 Inner Carton of 6 Packs 1 Master Carton of 48 Packs

CHISEL BLADES

ONE SIDED

SLICE Chisel Blades (one sided) are compatible with crafting tools, including SLICE Craft Knives and Scalpel. These blades boast a finger-friendly edge that never rusts. They're perfect for detailed, precise work, removing small labels, and scraping smaller surfaces. Besides crafting, these chisel blades are great for lab workers and electronics manufacturers due to their non-conductive properties.

PRODUCT DETAILS

Model	10534
PRODUCT CODES	10534
Dimensions LxWxH	32.9 x 8.04 x 0.89 mm
Weight	1.03 g
Compatible with	10548, 10568, 10589
Available in	4 Units in Retail Packaging 1 Inner Carton of 6 Packs 1 Master Carton of 48 Packs

SEAM RIPPER BLADES

POINTED TIP

SLICE Seam Ripper Blades (Pointed Tip) are compatible with multiple tools, including SLICE Seam Rippers, Craft Knives, the Scalpel, and the Precision Knife. The narrow, pointed tip slides easily between stitches, catching and cutting thread without the tugging that damages the surrounding fabric. From removing fine stitches to weeding vinyl, SLICE makes people and places safer.

PRODUCT DETAILS

Model	10537
PRODUCT CODES	10537
Dimensions LxWxH	32.8 x 6.06 x 0.8 mm
Weight	0.69 g

Other features

FIRST THINGS FIRST

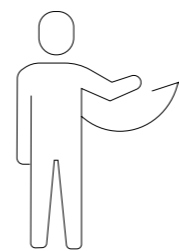

Always ensure a secure footing. If possible, wear gloves. Even if our knives are already very safe, the gloves protect you during your other activities. A safety knife is designed to cut. Please do not use it for leverage, as a hammer, or for other unsuitable actions. You could injure yourself and damage the knife.

PROTECTION OF PERSONS AND GOODS

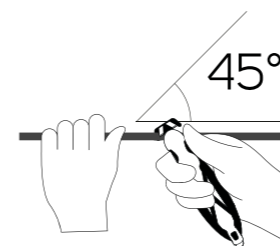

PROTECTION OF THE USER: PRICELESS! GOODS PROTECTION: NOT QUANTIFIABLE!

- Due to multiple protection mechanisms, a safety knife reduces the risk of personal injury
- Always carefully select the best and safest knife for your application. We are happy to help!
- Our three security levels also give you guidance
- Choose the highest level of safety with which you can do your job.
- Even a shortened blade reduces the risk of injury. Choose the blade length as required for your cutting activity
- Many of our blades have rounded tips to reduce the risk of puncture.

ALWAYS CUT AWAY FROM THE BODY!!

Your body should never be inline, rather always offset to the material that you are cutting. If possible, cut away from the body, otherwise at least past the body. Choose a safe stance. Your free hand should never be in the cutting path! By the way, a fresh, sharp steel blade is always safer than a blunt steel blade because you can only use a blunt steel blade with extra force. Sharp steel blades use little force and you can cut in a controlled manner.

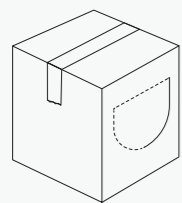

45° ANGLE

LESS FORCE = EASIER WORK = LESS RISK OF INJURY

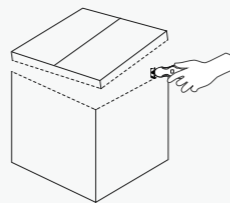

- When cutting corrugated cardboard, tilt the knife slightly sideways. This significantly reduces the necessary force.
- Always cut strapping at a 45° angle. As a result, the strap is cut easily and with little force.
- Ensure that films and tapes are always taught, before you cut them. The blade cuts up your material better!

TYPES OF CUTTING

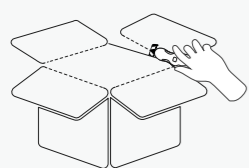

WINDOW SECTION

A window is cut into a cardboard box, to remove goods in a targeted manner

BOX TOPPING

Remove the top of the box completely. Especially comfortable with all safety knives with guard, e. g. S 4 and S 7.

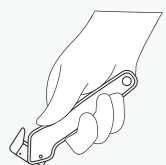

OPEN TABS

Cut off the 4 opened tabs. Put the box on the shelf or the display in a targeted manner.

ROLLED GOODS

Material is usually under pressure when cutting from a roll. These are usually high force cuts. Choose one of our robust Knives.

TAPE SPLITTER

Many of our safety knives have an integral tape splitter. With it, you can easily split adhesive tape. This protects the blade life and prevents adhesive residue from depositing on your blade.

CUTTING MATERIALS

Strapping

Corrugated cardboard

Rubber

Film and Foil

Bagged goods

PVC, felt, textile

Adhesive tape

Rolled goods

Yarn, string

OTHER FEATURES

WHY ACCEPT LESS?

We help you to select the right safety knife. Because our customers should buy out of conviction. This catalogue provides you with a first overview. But of course we advise you in person, on the phone, by e-mail, video call or at your site. A detailed workplace analysis is a matter of course for us and helps your team select the right safety knives. We of course stand by to support, even after the purchase, with training and advice at any time.

Our safety knives and all other products have been developed using state-of-the-art technology and meet the highest standards in terms of workmanship and materials. At the same time, intelligent technologies make our products particularly safe. Nevertheless, despite all the protective mechanisms, these knives can still pose a risk, not only if they are used incorrectly. Our blades - including safety blades and finger-friendly ceramic blades - are first and foremost blades and cut. Therefore, please handle all our products with great care and caution. Modifications are not permitted, can cause hazards and invalidate any warranty.

We hope you enjoy using our safety knives at all times - always a cut above!
